Phone 815-477-7400  
Fax 815-477-7406

*Design Studio*  
INC.

## HOW TO MEASURE A KITCHEN

*The first step in kitchen layout is measuring your kitchen.  
You'll need to make a sketch of the room, using the  
attached graph paper and counting each square as 3".*

### FOLLOW THESE STEPS

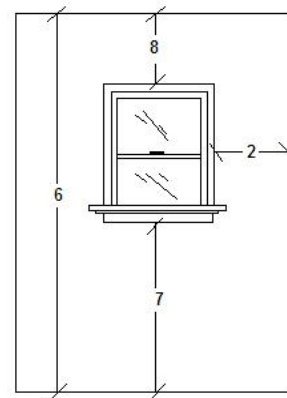

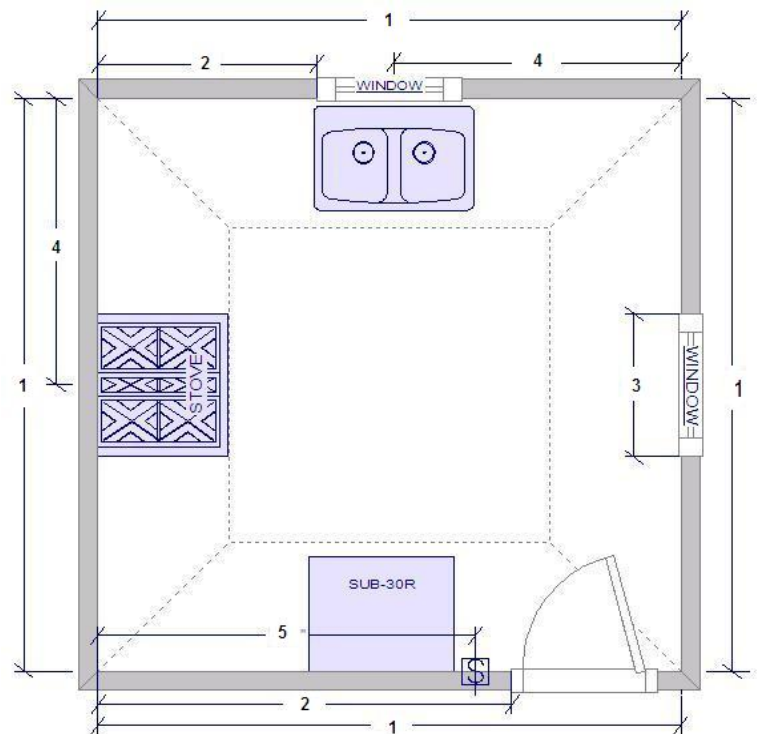

#### *HORIZONTAL DIMENSIONS*

1. Each wall from corner to corner.
2. From the nearest corner to the outside edge of each door or window casing.
3. The overall width of the doors and windows, including the casing.
4. From the nearest corner to the centers of water supply lines, drain lines, and gas feed lines.
5. From the nearest corner to the centers of electrical outlets and switches.

#### *VERTICAL DIMENSIONS*

6. From the floor to the ceiling.
7. From the floor to the bottom edge of window stools or casings.
8. From the ceiling to the top edge of door and window casings.

*Once you have these dimensions you're ready to have  
the team of **Cabinet Solutions Design Studio** design your  
dream kitchen.*

***If you bring in your dimensions to us we'll do the first design and pricing for free!***
